ADDITIONAL INFORMATION:

Situation:

33600A series Waveform Generators built with FW revision A.02.00 until A.02.02 are allocated with incorrect non-volatile memory size of 78.5MB instead of 970MB.

Solution/Action:

To check if your waveform generator is affected, connect your unit to the PC via USB and go to My Computer. In My Computer, double click on the waveform generator icon and check if the internal storage size is 78.5MB.

If the internal storage size of your 33612A waveform generator is 78.5MB instead of 970MB, please return the instrument to the nearest service center for repair.

At service center:

1. Verify if returned units are with incorrect non-volatile memory size.
2. Replace the front panel board for affected units.
3. After board replacement, verify if internal storage has the correct size (970MB).
4. Perform full calibration and testing.
