To Be Performed By: Agilent Qualified Personal or Customers Parts Required:

P/N	Description	Quantity
5021-4302	M4x0.7 20mm-lg pan-hd w/ patchlock, black	2

Situation:

Recommend replacing the side-handle mounting screw with the new longer screw with patchlock (baked-on plastic) that impedes loosening.

		ADDITIONAL INFORMATION:	

Solution / Action:

- 1) Inspect the side-handle mounting screws. The old screws are silver- colored and should be replaced with the new black-oxide colored screws with patchlock.
- 2) If the screws are of the old type, remove the handle screws using a Torx-15 driver.
- 3) Using the shaft of the Torx driver pry off the handle end-caps. (Place the handle assembly on a flat surface with the screws pointing upward. Place the shaft of the driver between the end caps and the handle plastic. Pry off the end caps.)
- 4) Re-assemble the handle using the new black handle screws.
- 5) Re-attach the handle to the Infinium oscilloscope and torque the screws to 2.4 n/meters (21 in/lbs).
