70301A Tracking Generator**Serial Numbers:** 0000A00000 / 9999A99999

70301-60050 Attenuator Kit

Situation:

The 5086-7831 20 dB fixed attenuator used in the 70301A tracking generator is being obsoleted. The replacement attenuator, part number 0955-0216, is smaller than the original attenuator so a longer semi-rigid cable replaces the 70301-20030.

Both parts are included in the Attenuator Kit.

Solution/Action:

When replacing the 5086-7831 order the 70301-60050 Attenuator Kit.

Kit Contents:

- 20 dB fixed attenuator part number 0955-0216
- Semi-rigid cable part number 70301-20050

DATE: 19 March 1993
