ADDITIONAL INFORMATION:

Situation:

Due to a possible defective memory module that has been found in the UXM 5G Vadatech board that has been shipping since June 2020. Keysight have agreed to implement a service note to replace all the existing UXM 5G Vadatech boards that could exhibit this issue.

This service note will apply to all E7515B instruments with serial numbers listed in the appendix..

Solution/Action:

The risk of failure is low but on the next service event Keysight will proceed to check the serial number of the unit and if it is at risk will proceed to replace the Vadatech boards within the unit under this service note.
